## TO WHOM IT MAY CONCERN,

Thank you for taking the time to review my resume. It means a lot to me that my information has made it to you. I come from a background of large scale project management, technological programming and troubleshooting. My experience in these types of roles and eagerness to learn have driven me towards a career choice in full stack web development.

Skills that I obtained in my past have been an asset for me throughout my time learning to program. I continually use my project management and troubleshooting skills to learn on the fly, correct errors quickly and deploy projects in a timely manner.

My proven track record of successful projects, always striving to meet or exceed quotas and deadlines, along with my reputation of being able to adapt quickly, overcome challenges, take command, and provide a good attitude make me feel confident that I can bring value to your development team.

Sincerely,

Brandon Gardner
